

AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph at page 8, lines 2 – 4 with the following amended paragraph:

(2) Add pure water in the basic materials gotten in the (1) step and adjust the density of the basic materials (i.e. waste, seeding material and nutrient together) got in the (1) treatment to 2% - 5% (by weight).

Please replace the paragraph at page 8, lines 5 – 6 with the following amended paragraph:

(3) Adjust the temperature of the reactor to between 35 – 45 degrees Celsius.

Please replace the paragraph at page 8, lines 17 – 18 with the following amended paragraph:

5. The reactor is horizontal, and the rotating speed along the horizontal axis is set 25 – 35 rpm/m.

**Please replace the paragraph at page 8, lines 22 – 23 with the following
amended paragraph:**

1. The basic material (waste) in the continual reactor has its solid density being 2% - 5% (by weight).

**Please replace the paragraph at page 9, lines 3 – 4 with the following
amended paragraph:**

4. The rotating speed of the reactor for stirring is 30 – 100 rpm/m.

**Please replace the paragraph at page 9, lines 5 – 6 with the following
amended paragraph:**

5. The temperature of the reactor is controlled at 35 – 45 degrees (Celsius).
